

DCS No:

Date: September 27, 1985

PRELIMINARY NOTIFICATION OF EVENT OR UNUSUAL OCCURRENCE--PNO-I-85-71

This preliminary notification constitutes EARLY notice of events of POSSIBLE safety or public interest significance. The information is as initially received without verification or evaluation, and is basically all that is known by the Region I staff on this date.

Facility: Various Region I Plants

Licensee Emergency Classification:

☐ Notification of Unusual Event  
☐ Alert  
☐ Site Area Emergency  
☐ General Emergency  
☐ Not Applicable  
☒ NONE

Subject: ACTIONS IN RESPONSE TO HURRICANE GLORIA

As of 10:00 a.m. today, Gloria was located about 50 miles east of Cape May, New Jersey and moving in a northerly direction at a speed of 30 miles per hour. Reactor facilities located along the coast have been implementing procedures in accordance with their emergency plans. A consolidated status report for potentially affected Region I facilities has been provided to the HQ IRC and is being periodically updated.

The Oyster Creek facility has reduced power levels (to 35%) commensurate with their plan and the hurricane is expected to move past the plant within the next two hours (i.e. by noon). The Indian Point and Shoreham units are shutdown. Millstone Units 1 and 2, and Haddam Neck are shutting down. Unusual event declarations have been made at these and several other plants further inland. Emergency response facilities have been staffed.

Region I has been tracking the progress of the hurricane and the status of the plants on a continuing basis by continuous manning of the regional IRC and 24 hour coverage at the sites. Extensive communications with State governments continues and the consolidated status report is being shared with emergency response officials.

This information is current as of 10:00 a.m.
