

ENCLOSURE 1

NOTICE OF VIOLATION

Mississippi Power and Light  
Grand Gulf

Docket No. 50-416  
License No. NPF-29

The following violations were identified during an inspection conducted on May 18 - June 15, 1985. The Severity Levels were assigned in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C).

1. 10 CFR 50, Appendix B, Criterion V states that activities affecting quality shall be prescribed by documented instructions, procedures, or drawings of a type appropriate to the circumstances and shall be accomplished in accordance with these instructions, procedures or drawings.

Contrary to the above, certain procedures were inadequate in that:

- a. Maintenance Procedure (MP) 07-S-53-C34-4 required placing the reactor feed pump controls in manual and lifting a steam flow input lead to the reactor vessel level system which resulted in a high reactor vessel level scram.
- b. Plant Administrative Procedure 01-S-06-24 did not clearly specify that a safety evaluation form (Attachment I of 01-S-06-24) was required to be filled out for temporary change No. 8 to MP 07-S-53-C34-4. This temporary change modified the facility as described in the FSAR.

This is a Severity Level IV violation (Supplement I).

2. Technical Specification 6.8.1 requires that procedures shall be established, implemented and maintained.

Contrary to the above, on June 6, 1985, as the result of a steam leak in the steam tunnel, valves Q1E51F207 and Q1E51F208 required by the Local Leak Rate Test Valve Lineup Procedure 09-S-08-2 to be closed were found in the open position.

This is a Severity Level IV violation (Supplement I).

Pursuant to 10 CFR 2.201, you are required to submit to this office within 30 days of the date of this Notice, a written statement or explanation in reply, including: (1) admission or denial of the alleged violations; (2) the reasons for the violations if admitted; (3) the corrective steps which have been taken and the results achieved; (4) corrective steps which will be taken to avoid further violations; and (5) the date when full compliance will be achieved.

Security or safeguards information should be submitted as an enclosure to facilitate withholding it from public disclosure as required by 10 CFR 2.790(d) or 10 CFR 73.21.

Date: JUL 11 1985
