RE: License Numbers: 34-16725-02

To Whom It May Concern:

Good Samaritan Medical Center and Bethesda Hospital intend to consolidate under the new corporate name of Genesis HealthCare System. The following information is being furnished in response to the outlined guide published in the NRC Information Notice number 89-25, Rev.1. The planned consolidation will not be finalized until written authorization is received from the Commission.

1. The new name of the licensee will be Genesis HealthCare System.
2. The new contact name is Tom Sieber, CEO, Genesis HealthCare System. Telephone number 614-454-4790.
3. There will be no change in the Radiation Safety Officer or any of the Authorized Users.
4. Good Samaritan Medical Center and Bethesda Hospital will remain in business as a licensed facility.
5. Good Samaritan Medical Center and Bethesda Hospital are consolidating in their entirety. Genesis HealthCare System will assume full responsibility for all current licensed activities.
6. There are no current changes planned for the location, facility, equipment or procedures. The entire organization will operate in accordance with current license conditions.
7. There will be no changes in the use, possession, location or storage of licensed materials.

8. Byproduct Material Transfer Information

In accordance with NRC regulations authorization is requested to interchange 10 CFR 35.100, 35.200 and 35.300 materials between Bethesda Hospital, 2951 Maple Avenue, Zanesville, Ohio and Good Samaritan Medical Center, 800 Forest Avenue, Zanesville, Ohio.

**PROCEDURE FOR ORDERING AND RECEIVING RADIOACTIVE MATERIAL:
APPENDIX K**

Conditions of transfer are as follows:

The reason we request the authorization to transfer byproduct material is simply one of economics. Both hospitals will be operated under the

RECEIVED

OCT 15 1996

REGION III

Pm: 10-7-96

301951

same administrative controlling structure. The authorized users are the same for both facilities. Since there is continual rotation of physicians through these two facilities, it seems appropriate that the same NRC-licensed physicians or their trained designee would be able to occasionally carry radioactive materials between facilities. Cost efficiency would be affected by the savings in delivery cost and the ability to receive quantity discounts.

The details of the transfer are as follows:

Exchanges of radioactive material between Good Samaritan Medical Center and Bethesda Hospital will be bi-directional via physician or trained hospital courier. The receiving facility may or may not return the unused materials to the provider facility.

A typical transfer would be one in which the named user physicians or designee would pick up the unit doses from one facility where each unit dose would be labeled, protected with lead shielding (if necessary) and packaged in the container in which the material was shipped in unit doses from either a radiopharmaceutical supply house or a local radio-pharmacy. As such, the package will be appropriately labeled and of sufficient packing material/absorbent paper and container to meet D.O.T. regulations. The package will be placed in the trunk section of the physician's car or designee's automobile where it will be secured via a locked trunk lid and carried to the receiving hospital. The courier will, upon arrival at the receiving hospital, immediately remove the package and carry it to the receiving area of the facility for proper handling from that point by the licensee.

The byproduct material will be tended under the constant surveillance and immediate control of the physician or courier while in transit.

Administrators of the facilities involved have agreed to this transfer arrangement.

Receipt and package opening procedures shall be at least equivalent to those outlined in attached Item 10.6 of this application.

Emergency procedures to be followed by the transporter in the case of accident or vehicle breakdown while in transit:

- a. Leave required D.O.T. shipping papers with the vehicle containing the sources.
- b. Secure the sources against unauthorized removal and remain with the package.
- c. If the transport cases have been disturbed, restrict the area until a survey is performed.
- d. If the vehicle must be towed, transfer the sources to an operative vehicle to complete the delivery. Survey the damaged vehicle before releasing it for towing or repairs.
- e. Notify the Radiation Safety Officer as soon as possible.

Emergency procedures to be followed in the case of theft or loss of radioactive materials is as follows:

- a. If the loss or theft of licensed material is in such quantities and under such circumstances that it appears to the licensee that a substantial hazard may result to persons, the licensee shall report immediately by telephone to the Director of the Regional Compliance Office of Region III of the U.S.N.R.C.
- b. This report will be followed up with a written report within 30 days to the NRC Regional Office with a description of the material, a description of the incident and actions which have been taken to recover the materials and to prevent the recurrence of the incident.

Vehicles to be used for transporting materials will be surveyed for contamination. A survey will be made as part of the usual survey of incoming packages at the receiving hospitals and maintained as part of that record.

There are no other changes pending that would require amendment action.

9. All surveillance items and records including calibrations, leak tests, surveys and inventories will be current at the time of transfer of ownership.
10. We confirm that all records required for decommissioning, public dose, waste disposal, radioactive spills, etc. will be held for review in accordance with NRC regulations at each specific site location.

We also confirm that at no time will radioactive material possession limits be exceeded.
11. We confirm that the facility is not currently nor will it be contaminated prior to transfer.
12. Financial assurance for decontamination of this facility is not required, however, Genesis HealthCare System assumes all responsibility for licensed materials at this facility.
13. We confirm that Genesis HealthCare System agrees to abide by all commitments and representations previously made to the NRC by Bethesda Hospital and Good Samaritan Medical Center.

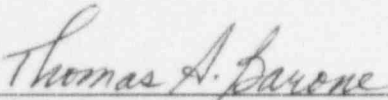

There is no current contamination of the facility.
There are no outstanding inspection items.

14. Good Samaritan Medical Center and Bethesda Hospital agree to the corporate changes uniting both facilities. This agreement is confirmed by the signatures affixed to this document.

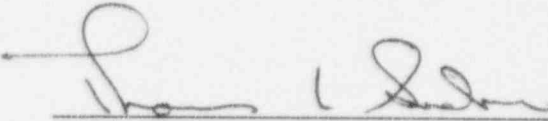

An outline of the new administrative structure including clear enunciation of authority for the implementation and conduct of the radiation safety program at both hospitals is appended to this document. (To be forwarded when available.)

An organizational chart depicting the licensee's management structure, reporting paths and flow of authority is also attached. (To be forwarded when available.)

15. Genesis HealthCare System agrees to abide by all the constraints, conditions, requirements, representations and commitments identified in the existing license.

Administrator,
Good Samaritan Medical Center

Administrator,
Bethesda Hospital

Attachment 10.6

Procedure for Ordering and Receiving Radioactive Material

1. The Radiation Safety Officer (RSO) or a designee must authorize each order for radioactive materials and ensure that the requested materials and quantities are authorized by the license for use by the requesting authorized user and that possession limits are not exceeded.
2. The RSO will establish and maintain a system for ordering and receiving radioactive material. The system must contain the following information:
 - a. For routinely used materials
 - (1) Written records that identify the authorized user or department, isotope, chemical form, activity, and supplier will be made.
 - (2) The above records will be checked to confirm that material received was ordered through proper channels.
 - b. For occasionally used materials (e.g., therapeutic dosages)
 - (1) The authorized user who will perform the procedure will make a written request that indicates the isotope, radiopharmaceutical, activity, and supplier.
 - (2) The person who receives the material will check the physician's written request to confirm that the material received is what was ordered.
3. For deliveries during normal working hours, the RSO will tell carriers to deliver radioactive packages directly to a specified area.
4. For deliveries during off-duty hours, the RSO will tell security personnel or other designated persons to accept delivery of radioactive packages in accordance with procedures outlined in the memorandum enclosed.

SUBJECT: ACKNOWLEDGEMENT OF CORRESPONDENCE
(Letter & Application Dated 10/01/96)

Dear Licensee:

In response to your request, we have completed the initial processing, which is an administrative review of your application for a(n):

☐ New License ☒ Amendment ☐ Renewal
☐ Termination ☐ Auth User (Amendment not required)
☐ Other _____

No administrative deficiencies were identified during this initial review. However, it should be noted that a technical review may identify omissions in the submitted information.

It appears that your request is routine (see 1-3 below, as applicable).

1. New and amendment actions are normally processed within 90 days, unless we find major deficiencies, or policy issues requiring central program office assistance.
2. Renewal actions are normally processed within 180 days, however, under timely filing (before expiration), you may continue to operate under your existing license.
3. Termination actions are normally processed within 90 days, unless confirmatory surveys following decontamination/decommissioning activities are involved.

A copy of your correspondence has been forwarded to our Licensing Fee and Debt Collection Branch (301/415-6097) for approval of the fee category and amount, if required.

If you have a compelling safety or business-related reason for requesting expedited review, please contact the Materials Licensing Branch at (630) 829-9887. We will try to complete your request as soon as practicable. Any correspondence about this request should reference the control number.
