

## MATERIALS LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 40 and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Licensee	
1. Beta Osteoporosis Diagnostic Center of Fairfax Virginia	3. License number 45-23077-01
2. 8316 Arlington Boulevard Fairfax, Virginia 22031	4. Expiration date June 30, 1990
	5. Docket or Reference No. 030-20244
6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form
A. Iodine 125	A. Sealed sources AECL-CP Models C-235, C-236 or Amersham Models TMC-129, 4052, 4040, or ANO-01
	8. Maximum amount that licensee may possess at any one time under this license
	A. Two sources not to exceed 400 milli-curies per source
9. Authorized use	
A. For use on humans in Norland Corporation Model 2780 (formerly Models 278 and 278A) Medical Diagnostic Bone Scanner for bone mineral analysis.

CONDITIONS

10. Licensed material shall be used only at the Beta Osteoporosis Center, 8316 Arlington Boulevard, Arlington, Virginia; Biomedical Applications of Northern Virginia, 1701 North George Mason Drive, Arlington, Virginia; Northern Virginia Dialysis Center, 5249 Duke Street, Alexandria, Virginia; and at the following facilities and locations in Washington, D.C.:
1. Biomedical Applications of Capital Hill, 900 M Street, S.E.
  2. Biomedical Applications of Columbia Heights, 106 Irving Street, N.E.
  3. Biomedical Applications of Dupont Circle, 11 Dupont Circle
  4. Biomedical Applications of Greater Southeast Washington, 1350 Southern Avenue, S.E.
  5. Biomedical Applications of Northeast Washington, 1302 Rhode Island Avenue, N.E.
  6. Biomedical Applications of Anacostia, 3829 Minnesota Avenue, N.E.
  7. Biomedical Applications of Takoma Park, 235 Carroll Avenue, N.E.

## CONDITIONS

11. The licensee shall comply with the provisions of Title 10, Chapter 1, Code of Federal Regulations, Part 19, "Notices, Instructions and Reports to Workers; Inspections" and Part 20, "Standards for Protection Against Radiation."
12. Licensed material shall be used by William J. Cirksema, M.D., Michael C. Gelfand, M.D., Alberto N. Martino, M.D., Benjamin P. Hernandez, M.D., Kenneth L. Geoly, M.D., Alfredo R. Zarate, M.D., A. Keldun Nossuli, MD., or David B. Kessler, M.D.
13. The Radiation Protection Officer for the activities authorized by this license is Kenneth L. Geoly, M.D.
14. Sealed sources containing licensed material shall not be opened.
15. A.
  - (1) Each sealed source containing licensed material, other than Hydrogen 3, with a half life greater than thirty days and in any form other than gas shall be tested for leakage and/or contamination at intervals not to exceed six months. In the absence of a certificate from a transferor indicating that a test has been made within six months prior to the transfer, a sealed source received from another person shall not be put into use until tested.
  - (2) Notwithstanding the periodic leak test required by this condition, any licensed sealed source is exempt from such leak tests when the source contains 100 microcuries or less of beta and/or gamma emitting material or 10 microcuries or less of alpha emitting material.
  - (3) The periodic leak test required by this condition does not apply to sealed sources that are stored and not being used. The sources excepted from this test shall be tested for leakage prior to any use or transfer to another person unless they have been leak tested within six months prior to the date of use or transfer.
- B. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surfaces of the device in which the sealed source is permanently mounted or stored on which one might expect contamination to accumulate. Records of leak test results shall be kept in units of microcuries and maintained for inspection by the Commission.
- C. If the test reveals the presence of 0.005 microcurie or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with Commission regulations. A report shall be filed within five (5) days of the test with the U.S. Nuclear Regulatory Commission, Region II, Division of Radiation Safety and Safeguards, Nuclear Materials Safety Section, 101 Marietta Street, Suite 2900, Atlanta, Georgia 30323, describing the equipment involved, the test results, and the corrective action taken.

## CONDITIONS

- D. The licensee is authorized to collect leak test samples in accordance with the procedures described in the licensee's letter dated May 20, 1985 for analysis by Health Physics Services, Inc. Alternatively, leak test samples may be collected and/or analyzed by other persons specifically authorized by the Commission or an Agreement State to perform such services.
16. The licensee may transport licensed material or deliver licensed material to a carrier for transport in accordance with the provisions of Title 10, Code of Federal Regulations, Part 71, "Packaging of Radioactive Material for Transport and Transportation of Radioactive Material Under Certain Conditions."
17. Except as specifically provided otherwise by this license, the licensee shall possess and use licensed material described in Items 6, 7, and 8 of this license in accordance with statements, representations, and procedures contained in application dated April 16, 1985 and letter dated May 20, 1985. The Nuclear Regulatory Commission's regulations shall govern the licensee's statements in applications or letters, unless the statements are more restrictive than the regulations.
