RE: Notice of Violation  
Docket No. 030-32721  
License No. 37-28744-01

Dear Mr. Costello,

In reference to the violation of license condition 14 of NRC License No. 37-28744-01 discovered during the inspection held on Oct 21, 1996, we offer the following explanation and corrective actions taken.

The violation occurred as the result of the in-place procedure which did not provide an adequate schedule to ensure that all gauges are inventoried at 6 month intervals. Professional Inspection and Testing Services, Inc (PITS) accepts full responsibility for this violation; however, PITS would like it known that gauges are inventoried on a daily basis by the RSO or Supervisor, as each gauge is signed out and returned. PITS is aware of each gauge's location/destination at all times.

To ensure that a reoccurrence of this violation does not repeat, management has logged scheduled inventory dates in the laboratory's schedule log, which is reviewed each day by the RSO, Terry Fahrney, and/or supervisors Keith Stewart or Steven Kundla. As a back-up, PITS corporate office will monitor the above corrective actions to ensure the RSO has complied with the inventory at the required 6 month intervals.

Full compliance was achieved on 10/23/96 when a complete inventory was performed. Enclosed please find a copy of the current inventory.

If I can be of any further assistance or if you are need of additional information, please feel free to contact myself or Terry Fahrney at 717-263-7964.

Sincerely,

PROFESSIONAL INSPECTION AND TESTING SERVICES, INC.

  
Rose McNew  
President
