Mr. Joseph C. Wang
Material Licensing Branch
Division Of Fuel Cycle & Material Safety
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

SUBJECT: Renewal of Material License Number 42-13553-02

Dear Mr. Wang:

Please renew our radioactive materials license number 42-13553-02 which expires on June 30, 1984.

The CBI Isotope Safety Program submitted by letter dated November 4, 1983, and approved under license amendment number 8 on December 21, 1983 is still current with the exceptions of a few changes in Sections 3, 8 and 15 of that program (manual).

Enclosed are two (2) copies of the corrected index page and all pages of Sections 3, 8 and 15. The changes in these sections consists of:

- 1) Section 3 pp 4 and 6 were corrected to show recent district personnel changes.
- 2) Section 8 p 3 had the distance updated to the latest regulations and page 4 had the indicator knob added to cover Model 900 or 920 exposure devices.
- 3) Section 15 p 1 and 2 had some words added or changed for clarification and on p 5 added vendor survey meter calibration reports and moved vendor dosimeter calibration reports from source records to meter records where it should be.

Please replace the existing pages in your copies of the CBI Program with these revised pages.

Enclosed is a check in the amount of \$460.00 for the renewal fee.

Thank you for your prompt attention to this matter. My telephone number is 713-466-7581, extension 271.
