

JUL 15 1985

Docket No. 50-322

Long Island Lighting Company
ATTN: Mr. John D. Leonard, Jr.
Vice President-Nuclear
P.O. Box 618
Shoreham Nuclear Power Station
Wading River, New York 11792

Gentlemen:

Subject: Inspection No. 50-322/85-16

This refers to the special physical protection inspection conducted by Mr. R. J. Bailey of this office on March 4-8, 1985, of activities authorized by NRC License No. NPF-19 and to the discussions of our findings held by Mr. Bailey with Mr. J. Smith and other members of your staff at the conclusion of the inspection.

The purpose of this inspection was to determine the state of training of security force personnel at the Shoreham Nuclear Power Station and their ability to carry out assigned duties. The findings of the inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. The inspection consisted of reexaminations of a statistically selected sample of security personnel in qualification/requalification tasks; observations of examination administration; interviews of security personnel; reviews and evaluations of examination results; and reviews of security event reports.

Within the scope of this inspection, no violations were observed. The inspection determined that, with a 95% confidence level, security force personnel are sufficiently knowledgeable to carry out their assigned duties. While statistically unacceptable failure rates on certain examinations were observed for a specific group in the security organization, observations of on-the-job performance of this group by the inspectors determined that the apparent training deficiencies did not constitute a significant weakness in your security program. Remedial training was promptly initiated by your staff for those members of the security organization who failed any test and each such individual was subsequently requalified.

In accordance with 10 CFR 2.790 (a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.
