DOCKET 50-255 - LICENSE DPR-20 - PALISADES PLANT
SUMMARY OF DESCRIPTION OF THE INSTALLED VEHICLE CONTROL
MEASURES, REVISION 2

On August 1, 1994, the Nuclear Regulatory Commission (NRC) issued an amendment to 10 CFR Part 73 which modified the design basis threat for radiological sabotage. The amendment required reactor licensees to install vehicle control measures, including vehicle barrier systems, to protect against the malevolent use of a land vehicle.

On February 28, 1995, Consumers Power Company submitted a summary description of the proposed vehicle control measures as required by 10 CFR 73.55(c)(7), and the results of the vehicle bomb comparison as required by 10 CFR 73.55(c)(8).

Attached is Revision 2 of the summary description of the installed vehicle control measures, which identifies a change to the vehicle barrier design made to address specific site conditions.

The information contained in the enclosed documents has been classified as safeguards information. Therefore, Consumers Power Company requests that the attachment to this letter be withheld from public disclosure in accordance with 10 CFR 73.21(c).
