Dear Mr. Terry:

An NRC inspection was conducted November 18-22, 1996, at your Comanche Peak Steam Electric Station, Units 1 and 2, reactor facilities. The enclosed report presents the scope and results of that inspection.

This routine, announced inspection focused upon your radiation protection activities during the Unit 1 Refueling Outage 1RF05. We determined that you had implemented an effective radiation protection program to address the radiological challenges encountered during the refueling outage.

Should you have questions concerning this inspection, we will be pleased to discuss them with you.
