Gentlemen:

On December 12, 1984, Duquesne Light Company (DLC) met in Bethesda, MD, with the Materials and Testing Engineering Branch to discuss the PSI Program, which was submitted June 29, 1984 (Reference 1). The NRC recently issued a meeting summary and comments on the program (Reference 2). On January 31, 1985, DLC submitted an alternative plan for the preservice examination of ASME Class 2 piping welds (Reference 3). On May 20, 1985, the NRC approved the methodology of the plan for ASME Class 2 welds (Reference 4). On January 17, 1985, DLC met in Bethesda, MD, with the Mechanical Engineering Branch to discuss the criteria for pressure isolation valve leak testing (References 5 and 6).

The staff has recently issued the final draft of the Safety Evaluation Report (Reference 7). Open Issue 6 is on the submittal of the PSI and ISI Programs. Open Issues 2 and 3 are the preservice and inservice testing of pumps and valves. FSAR questions 210.40, 210.41, and 250.1 requested information on those programs earlier.

The purpose of this letter is to provide a submittal date for the completed PSI program document and for the preliminary ISI program document, as well. The completed PSI program document is scheduled for December 31, 1985. The preliminary ISI program document is scheduled for June 30, 1986. The scheduled dates are selected to support the BVPS-2 fuel load date of April 30, 1987.

The PSI program document will incorporate resolutions to the staff comments, the alternative plan for the examination of ASME Class 2 piping welds and the DLC proposed pump and valve leak testing program with specific requests for relief from Section XI of the ASME Code.

We trust that these submittal dates are acceptable. If you have any questions or comments, please let us know by July 31, 1985.
