Dear Mr. Weber:

Pursuant to activities authorized by NRC License SNM-1097, GE's Nuclear Energy Production (NEP) facility hereby submits a minor revision to the Radiological Contingency and Emergency Plan (RC&EP) that does not reduce the effectiveness of the plan.

Revisions are provided in Attachment 1 by entire chapter to facilitate replacement into the existing RC&EP manual. Chapters containing changes have the same submittal date (12/16/96) on the bottom of each page. These changes are indicated by an asterisk (\*) in the right hand column of each page.

Six copies of this RC&EP submittal are hereby provided for your review.

If you have any questions or would like to discuss the matter further, please call me on (910) 675-5889.

Sincerely,

GE NUCLEAR ENERGY
