Director,
Nuclear Reactor Regulation
US Nuclear Regulatory Commission
Washington, DC 20555

DOCKET 50-155 - LICENSE DPR-6 - BIG ROCK POINT PLANT -
REVISED TECHNICAL SPECIFICATION CHANGE REQUEST -
RELOAD II FUEL MAPLHGR LIMITS

Attached are three (3) originals and thirty-seven (37) conformed copies of a request for change to the Big Rock Point Technical Specifications.

This change request revises our change request dated August 16, 1985. Preliminary review by the NRC staff of our previous submittal indicated a change to the MCPRL limits for II fuel may be required. Consumers Power Company agrees with the staff's concerns and has modified the changes requested accordingly. Expeditious review of this change is requested so that approval may be obtained prior to startup from our current refueling outage. These changes are requested to implement reactor operating limits for reload II fuel.

Pursuant to 10CFR170.12(c) a check in the amount of \$150.00 was attached to our submittal dated August 16, 1985 and therefore no fee is remitted with this submittal.
