Dear Mr. Matthews:

Subject: NRC Sizewell Evaluation Report

The purpose of this letter is to provide a further opportunity for you to comment on our draft report, so as to assure that the final report accurately describes the Sizewell design and philosophy.

The draft report enclosed includes those corrections we were able to identify during our meetings with NII and CEGB in December, and also takes account of later CEGB comments provided in early February 1983. We intend to complete the final report by about March 11, 1983 and would appreciate any further comments before that time. I will provide you with a copy of the final report when it is complete.

Sincerely,

Original Signed by
H. R. Denton

Harold R. Denton, Director
Office of Nuclear Reactor Regulation
