

Docket No. 50-346
License No. NPF-3
Serial No. 1170
July 26, 1985

Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz
Operating Reactor Branch No. 4
Division of Licensing
United States Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Stolz:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1.

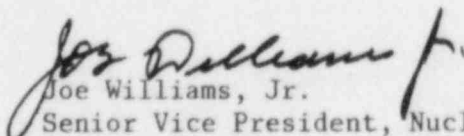

This application requests that the Davis-Besse Nuclear Power Station Unit 1 Technical Specifications, Appendix A, be revised to reflect the changes attached. The proposed change involves Section 6.5.2.9.

The attachment provides the proposed change, its safety evaluation and significant hazard consideration. The proposed change revises the Technical Specification that requires the Company Nuclear Review Board (CNRB) report to and advise the President and Chief Operating Officer. Under the proposed change the CNRB would report to and advise the Senior Vice President, Nuclear. This results from the restructuring of the CNRB and recent corporate reorganization.

Toledo Edison requests that this amendment request be granted by December 31, 1985.

Enclosed is a check for \$150 as required by 10CFR170.12(C) for license application.

Very truly yours,

Joe Williams, Jr.
Senior Vice President, Nuclear
