Distribution:

Dear Mr. Themelis:

(Return to WM, 623-SG)

We have reviewed the Radiological and Engineering Assessments (REAs) dated March 27 and April 25, 1985 for the vicinity properties in Salt Lake City, Utah at 48 Gregson Avenue (SL-092), 42 East 3300 South Street (SL-020/SL-320), and 3275 South 900 West Street (SL-206). We concur with the remedial actions recommended in these REAs. This concurrence is based on the following conditions:

1. We have concurred in the current version of the VPMIN^M;
2. The recommended action in each REA involves less than 10,000 cubic yards of contaminated material and is intended to meet the primary EPA standards; and
3. The removed contamination will be placed in the Vitro site tailings in South Salt Lake. Final disposal will be with the Vitro site tailings at the Clive disposal site.

Please notify us immediately of any action or decision which may affect any of these conditions.

If you should have any questions on this or any other vicinity property remedial action concurrence, please contact Dennis Sollenberger of my staff at (FTS) 427-4789.

Sincerely,

Original signed by

Leo B. Higginbotham
