Washington, D.C. 20555

Dear Lillian,

I am enclosing our fourth quarterly report on the first year of the Regional Career Counseling Program. The evaluations represent only the fourth quarter, since you have already received the rest in previous reports. I would appreciate any comments that you or Peter Goldman have to make, and would be happy to meet with you to discuss the matter, if you would find it useful.

I find it distressing that we have heard nothing from the Texas region. I feel reticent about calling them since it is clear that they wish BEMW Inc. to keep out of their affairs while they make their choice of counselor. The contract year is almost one quarter over, however, and they have not yet begun their program as opposed to the other regions which are well underway.

You will also be receiving, within the next week, our final report and statistics for the 1983 counseling year here in H.Q. I have heard that your department is developing a training study using some of our previous statistics, and feel gratified that the final reports are of some use to you.

I hope that your summer is a pleasant one.

Sincerely,

Irene N. Mendelson
