ATTN: Mr. H. B. Tucker, Vice President
Nuclear Production Department
422 South Church Street
Charlotte, NC 28242

Gentlemen:

SUBJECT: REPORT NOS. 50-369/85-20 AND 50-370/85-21

On May 21-24 and June 3-7, 1985, NRC inspected activities authorized by NRC Operating License Nos. NPF-9 and NPF-17 for your McGuire facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities violated NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are presented in the enclosed Notice of Violation.

We are concerned that your failure to retain records of shutdown margin calculations may be symptomatic of additional record keeping inadequacies. In your response to the violation, please address your review of operating procedures and your findings regarding required surveillance activities performed as part of operating procedure rather than periodic tests.

The responses directed by this letter and the enclosures are not subject to the clearance procedures of the Office of Management and Budget issued under the Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions concerning this letter, please contact us.

Sincerely,

151

Roger D. Walker, Director
Division of Reactor Projects
