Mr. Charles E. MacDonald, Chief  
Transportation Certification Branch  
Division of Fuel Cycle and  
Material Safety, NMSS  
United States Nuclear Regulatory  
Commission  
Washington, D. C. 20555

Dear Mr. MacDonald:

This is in response to your recent notice of expiration of our  
10CFR71 Quality Assurance Program, No. 0379.

Although we continue to hold an agreement state license for  
possession of radioactive materials, we do not foresee of a  
need to ship greater than Type A quantities of radioactive  
materials. Therefore, the approved Quality Assurance program  
for Radioactive Material Packages, No. 0379 is no longer  
required for our operations, and we do not intend to renew the  
approval for the program at this time.

Should we be required to have an approved quality assurance  
program in the future, we shall submit the application for NRC  
approval.

Sincerely,

Fred Hittman  
President
