Dear Sir:

The NRC was notified of a potentially reportable deficiency in
Reference (A), and an Interim Report was transmitted by Reference (B).
Time Extensions were requested by References (C) and (D). Our last
forecast indicated that the Final Report would be completed by
July 12, 1985.

Due to the extensive investigation and final evaluation of the bolting
material used, it is now expected that this information will be
finalized by August 12, 1985, at which time a complete report will
be submitted.

There is no new information or change to the Interim Report at this
time.

Very truly yours,

E E Van Brunt / JSK
