Re: Notification of Change in University Management as Required by the Breazeale  
Nuclear Reactor Technical Specifications

Dear Sir or Madame:

Formerly, the responsibility for the Breazeale Nuclear Reactor's NRC R-2 license was assumed by the Senior Vice President for Research and Graduate Education; this position ceased to exist upon the retirement of Dr. David A. Shirley effective December 31, 1996. Under a new university organization, the license responsibility now resides in the office of the Vice President for Research. Effective January 1, 1997, I, Dr. Rodney A. Erickson, have assumed the position of Interim Vice President for Research at the Pennsylvania State University.

This letter fulfills the Technical Specifications requirement (section 6.6.2.b) that a written report shall be made within 30 days to the USNRC for a permanent change in the facility organization involving level 1 and 2 personnel as defined in the reactor facility's Technical Specifications.

Sincerely,

Dr. Rodney A. Erickson  
Interim Vice President for Research
