FACSIMILE TRANSMITTAL LETTER

DATE: August 24, 1994

Please deliver the following message

TO: GLENDA C. JACKSON, USNRC License Fees

FAX #: (301) 415 - 5387

FROM: John (Jack) R. Dukes, Manager Nucleonics & Radiological Operations

Total Pages 3

If all pages are not received, call (614) 261-2448

Subject: ERRONEOUS INVOICES FOR 1994 ANNUAL FEES

Dear Glenda:

This is to confirm our telephone conversation on August 23, 1994 and to supply you additional information on the six erroneous invoices for NRC Annual Fees we have received to date. The incorrect invoices are for device and source registration certificates and are summarized on the attached spreadsheet. These six invoices represent a \$51,120 overcharge.

The erroneous invoices are numbered AM03375-94 through AM03380-94. These were all addressed to COMBUSTION ENGINEERING which has not been our company name for over 4 years now. The correct invoices listed in the top portion of the spreadsheet are correctly addressed to ABB Industrial Systems Inc for our two materials licenses and incorrectly addressed to ABB Process Automation for the device registration certificates. You will note that, to date, we have not received 1994 invoices for two of our active device registrations.

This is the third year in a row that you have sent an erroneous invoice for Source Registration NR0109S120S. The invoices issued for 1992 and 1993 were contested and then canceled by the USNRC with assurances given both times that your records had been corrected and we would not have the problem again, but we do have the problem again. This sealed source registration was inactivated as part of our July 23, 1991 application for re-registration of certain existing device registrations. This was formally recognized as being inactive in an internal USNRC memo from John Lubinsky to Glenda Jackson dated July 17, 1992 (I can supply you another copy if you wish).

Four of the other five erroneous invoices are for device registrations which have been superseded by new device registrations. As shown in the top table, registrations NR0109D122B through NR0109D125B were applied for on July 23, 1991 and were finally issued June 9, 1993. These new registrations replaced and inactivated the old device registrations (D104G, D106G, D110B, and D116B). The new registrations specifically identify the ABB model numbers that used to be covered by the old registrations with a statement like "... formerly registered as the Model O-2", etc. We requested that the old registrations be made inactive in our July 23, 1991 application for the new registrations. Columns three and five of the spreadsheet show you the cross-reference of ABB models between the old and new registrations. You will also note that the old registrations were replaced by new inactive registrations with "800" numbers on June 9, 1993.

The final erroneous device registration, NR0109D105G, was requested to be made inactive in our response letter of April 21, 1993 to John W. Lubinsky, and by an additional letter dated April 22, 1993 to Steven L. Baggett. Fourteen months later, John Lubinsky completed the replacement "800" number inactive registration certificate.

Please officially cancel the six erroneous invoices, as you have in past years, and send me evidence of this action. I need to have this situation corrected as soon as possible so that I can process a timely request for payment to our finance department. You indicated you should be able to review and correct these errors within a couple of days.

Thank you for your prompt attention to this annually reoccurring problem.

John R. Dukes, Manager
Nucleonics and Radiological Operations
