MEMORANDUM FOR: R. L. Spessard, Director, Division of Reactor Safety
FROM: J. J. Harrison, Chief, Section 1D, DRP
SUBJECT: PERSONAL APPRECIATION TO ACKNOWLEDGE
THE OUTSTANDING PERFORMANCE OF ROLF WESTBERG

This memorandum is to commend Mr. Westberg for his outstanding performance during his temporary assignment to the NRC Task Force for the effort at the Waterford Nuclear Plant.

Upon my request for a technical specialist in the quality assurance area to the Division of Engineering, Mr. Westberg was immediately assigned to the Waterford Task Force. Mr. Westberg accepted his assignment openly, and diligently applied himself to the task. His performance was of exceptional quality in assisting me in organizing my effort and providing guidance to the QA team. He acted as my key assistant throughout the entire assignment. Mr. Westberg exhibited an exceptional leadership role and set an unparalleled example for other NRC and contract team members. He devised the key example of the written input format and content for the SSER, including reviewing the written product of the team prior to my review. Mr. Westberg gave unselfishly of himself to a very difficult task under extraordinary circumstances, including working long hours, countless weekends, and long periods away from his residence. His conduct in interfacing and in meetings with the licensee and contractors was extremely professional. Additionally, through his knowledge and expertise, inspection guidance was provided to the team and key findings were identified. Subsequent to the Waterford site efforts, Mr. Westberg has participated in the draft, comment resolution, editing, and final preparation of the SSER, both in the Region III office and in the offices of NRR in Bethesda.

The Division of Reactor Safety is fortunate to have an employee with the expertise, knowledge, and dedication of Mr. Westberg.

J. J. Harrison, Chief
