MEMORANDUM FOR: R. L. Spessard, Director, Division of Reactor Safety
FROM: J. J. Harrison, Chief, Section 1D, DRP
SUBJECT: PERSONAL APPRECIATION FOR ASSISTANCE FROM THE
DIVISION OF REACTOR SAFETY DURING THE WATERFORD
TASK FORCE EFFORT

This memorandum is to thank you for the assistance that your Division provided for me during the NRC Task Force effort at the Waterford Nuclear Plant.

In late March 1984, I was assigned as a team leader as part of the NRC Task Force to review approximately 350 allegations and to assess the quality of construction at the Waterford Nuclear Plant. Upon my review of my team assignment, I found myself in dire need of a quality assurance specialist. I also needed an individual whom I could rely on, who would be productive to the NRC's effort, and who would be able to function as my assistant. Your Division responded immediately and provided Mr. Rolf Westberg. I recognize your Division's work load was great, but your sacrifice and immediate response significantly contributed to the success of my team in accomplishing our Task Force assignment. It is also noteworthy that several other NRC Regions were contacted for similar assistance, but these requests were denied.

Mr. Westberg's performance was outstanding. His contributions and dedication made my team's effort a real success. His overall performance exemplified professionalism and directly reflected upon the high standards set by your Division, Region 3, and the NRC.

J. J. Harrison
