Docket No. 50-267

SUBJECT: I & E Inspection Report 85-06

REFERENCE: NRC Letter, Johnson to  
Lee, dated 05/07/85  
(G-85173)

Dear Mr. Johnson:

This letter is in response to the Notice of Violation received as a result of inspections conducted at Fort St. Vrain during the period March 5-8, 1985. The following response to the item contained in the Notice of Violation is hereby submitted:

10CFR50, Appendix B, Criterion XVI requires that conditions adverse to quality such as deficiencies, deviations, and nonconformances are promptly identified and corrected. The FSAR section B.5 implements the Appendix B requirements and delegates QA program definition and implementation to the Manager, Quality Assurance.

Contrary to the above, timely corrective action was not taken to promptly revise administrative procedures Q-15 and Q-16 as noted in CAR 84-093.

This is a Severity Level IV Violation. (Supplement I)  
(50-267/8506-01)

SC-062/85

- (1) The corrective steps which have been taken and the results achieved:

In order to provide the independence necessary to effectively implement the QA Program, all Section Q Administrative Procedures, except Q-0, Quality Policy and Q-1, FSV Organization and Responsibilities are authorized solely under the signature of the Manager, Quality Assurance Division. This change became effective May 23, 1985.

- (2) Corrective steps which will be taken to avoid further violations:

Based on the corrective actions described in (1) above, no further corrective steps are anticipated or required.

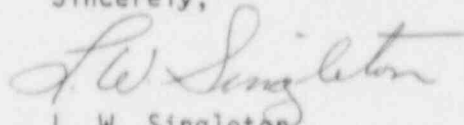

However, in order to reflect the changes in authorization of Level I, Section Q Procedures, Administrative Procedure G-2 which describes the FSV procedure systems will be revised.

- (3) The date when full compliance will be achieved:

Full compliance was achieved on May 23, 1985.

Should you have any further questions, please contact Mr. M. H. Holmes, (303) 571-8409.

Sincerely,

L. W. Singleton  
Manager, Quality Assurance  
Fort St. Vrain Nuclear  
Generating Station
