JUL 18 1974

Mr. Edward J. Bauser  
 Executive Director  
 Joint Committee on Atomic Energy  
 Congress of the United States

Dear Mr. Bauser:

On June 14, 15 and 20, 1974, Orders were issued to Isomedix, Inc., which suspended all use of byproduct material; rescinded the suspension as it applied to the licensee's Norton Grove, Illinois, facility; modified the suspension to allow the performance of specified limited operations at the licensee's Parsippany, New Jersey, facility. All other conditions of the Order issued June 14, 1974, as modified by the Orders issued June 15 and 20, 1974, remained in effect.

On June 24 and 28, and July 1 and 3, 1974, the licensee submitted an application with subsequent amendments, to the Directorate of Licensing requesting that their license be extended to permit the use of byproduct materials at the Parsippany, New Jersey facility as modified by additional safety equipment and under revised operating procedures. The amendment to the license was issued on July 5, 1974. An inspection of the licensee's facility on July 3, 1974, by representatives of Region I, Directorate of Regulatory Operations, revealed that the facility had been modified in the manner described in their license application and a system for assuring that procedures would be followed had been established. Therefore, having determined that operation of the facility is not contrary to the public health, safety or interest, I have issued an Order rescinding the Order dated June 14, 1974, as modified on June 15 and 20, 1974.

A copy of the Order is enclosed.

Sincerely,

Donald F. Knuth, Director  
 of Regulatory Operations

Enclosure:  
 Order dated July 8, 1974

8 July 1979

UNITED STATES OF AMERICA

ATOMIC ENERGY COMMISSION

IN THE MATTER OF )  
ISOMEDIX, INC. )

BYPRODUCT MATERIAL  
LICENSE NO. 29-15364-01 and  
LICENSE NO. 29-15364-02

ORDER RESCINDING ORDER ISSUED JUNE 14, 1974

I

Isomedix, Inc., 25 Eastmans Road, Parsippany, New Jersey, 07054, ("the licensee") is the holder of Byproduct Material Licenses Nos. 29-15364-01 and 29-15364-02 ("the licenses") issued by the Atomic Energy Commission ("the Commission"). The licenses authorize the licensee to possess and use byproduct material for the purpose of the irradiation of materials. License No. 29-15364-01 was issued on August 13, 1973, and the expiration date is June 30, 1978. License No. 29-15364-02 was issued on January 29, 1974, for use of material at Morton Grove, Illinois, and the expiration date is January 31, 1979.

II

On June 14, 1974, the Director of Regulatory Operations, after determining that potentially hazardous conditions may exist at the licensee's Parsippany, New Jersey, and Morton Grove, Illinois facilities, issued an Order to Show Cause suspending all use by the licensee of byproduct material under License Nos. 29-15364-01 and 29-15364-02 pending further order. The Order to Show Cause and the suspension of activities contemplated therein, were made effective immediately.

8264140213 4pp.

III

On June 15, 1974, the Director of Regulatory Operations, after determining that the public health, safety or interest no longer required the suspension of use of byproduct material at the licensee's Morton Grove, Illinois facility under License No. 29-15364-02, ordered that the Order issued June 14, 1974, insofar as it suspended all use of byproduct material at the licensee's Morton Grove, Illinois facility be rescinded.

IV

On June 20, 1974, the Director of Regulatory Operations, after determining that the public health, safety and interest would not be adversely affected, issued an Order that authorized the licensee to perform specified limited operations at the licensee's Parsippany, New Jersey facility. All other conditions of the Order issued June 14, 1974, as modified by the Order issued June 15, 1974, remained in effect.

V

By application dated June 24, 1974, as amended June 28, 1974, July 1, 1974, and July 3, 1974 to the Directorate of Licensing, the licensee requested that Byproduct Material License No. 29-15364-01 be amended to permit the use of byproduct materials at the licensee's Parsippany, New Jersey facility as modified by the installation of additional safety equipment and under revised operating procedures. Byproduct Material License No. 29-15364-01 was amended on July 5, 1974.

VI

An inspection of the licensee's Parsippany, New Jersey facility by representatives of Region I, Directorate of Regulatory Operations on July 8, 1974, disclosed that the modifications described in the applications for license amendment have been completed and that the licensee has established a system to assure that the procedures submitted with the applications and incorporated as a condition of the license will be followed.

VII

The Director of Regulatory Operations has determined that operation of the licensee's Parsippany, New Jersey facility in accordance with the provisions of Byproduct Material License No. 29-15364-01, is not contrary to the public health, safety or interest. WHEREFORE: IT IS HEREBY ORDERED THAT:

The Order issued June 14, 1974, as subsequently modified by Orders issued June 15, 1974 and June 20, 1974, is hereby rescinded.

FOR THE ATOMIC ENERGY COMMISSION

Donald F. Knuth  
Director of Regulatory Operations

DATED AT BETHSEDA, MARYLAND

THIS 8TH DAY OF JULY 1974

Order Rescinding Order Issued June 14, 1974 as amended June 15, 1974  
and June 20, 1974.
