Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(INSPECTION REPORT NOS. 50-250/85-21 AND 50-251/85-21)

This refers to the special inspection conducted on May 22-24, 1985, at the Turkey Point Nuclear Plant to review the circumstances surrounding the failure to implement approved compensatory measures in a timely manner in connection with a planned outage of the security computer. This event, which resulted from inadequate relaying of information between the Central Alarm Station operator and security supervisors, was discovered by licensee security personnel. It is noted that Unit 3 was in the refueling mode and Unit 4 was at 100 percent power at the time. An Enforcement Conference to discuss this matter was held in the Region II Office on June 4, 1985.

In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1985), the violation described in the enclosed Notice has been classified as a Severity Level III violation. Normally a civil penalty is considered for a Severity Level III violation. However, after consultation with the Director, Office of Inspection and Enforcement, I have decided that a civil penalty will not be proposed in this case because of the unusually prompt and extensive corrective action taken and your prior good performance in the area of concern.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR 2.790(d) and 10 CFR 73.21, safeguards activities and security measures are exempt from public disclosure; therefore, the enclosures to this letter, with the exception of the report cover page which presents a nonexempt summary, will not be placed in the NRC's Public Document Room.
