E. D. WEEKS
PLANT MANAGER
NUCLEAR PLANT OPERATIONS - HUMBOLDT

REGION V WIRE

September 17, 1985

Nuclear Regulatory Commission
Region V
Suite 210
1450 Maria Lane
Walnut Creek, CA 94596

Attention Mr. Greg Yuhas

50-133

According to your request (telephone conversation with R. C. Parker on September 6, 1985), we are sending you copies of the following documents for your use:

1. Letter dated February 4, 1982 (and its attachment)

This letter discusses the need for review of the proposed building and the attachment provides information for the review.

2. Plant Staff Review Committee Minutes dated November 1, 1982

This meeting of the PSRC provides the official "50.59" review of the construction, design and intended use of the structure.

3. Equipment Description and Operating Instruction F-5, "Solid Radwaste Facilities"

This part of the Plant Procedures describes the Solid Radwaste Facilities, including the new building.

4. Radiation Control Procedure 61, "Packaging, Labeling, Storage and Inventory of Solid Radioactive Materials"

Incorporated in this procedure are administrative requirements for the dose rate at the boundary of the Unit 3 radiation area.
