Glen Ellyn, IL 60137

SUBJECT: DAIRYLAND POWER COOPERATIVE  
LA CROSSE BOILING WATER REACTOR (LACBWR)  
PROVISIONAL OPERATING LICENSE NO. DPR-45  
QUALITY ASSURANCE PROGRAM

REFERENCE: (1) 10CFR50, Section 50.54.(a)(3)  
(2) 10CFR50.71

Gentlemen:

In accordance with References (1) and (2), we are sending Revision 3 of the La Crosse Boiling Water Reactor (LACBWR) Quality Assurance Program Description (QAPD) for your information.

This is an annual update, the changes are for reorganizational purposes and do not reduce our commitment of our previously accepted QADP.

This submittal is being transmitted in excess of the annual requirement of Reference (1) because of known organizational changes which took place in July and September 1985.

The changes involve the elimination of two positions (Assistant General Manager-Power and Radiation Protection Engineering Specialist) and the addition of one position (Training Specialist). The previous Assistant General Manager-Power has been selected to assume the responsibility as General Manager. In this position, the DPC General Manager will retain his responsibility for the Quality Assurance Program at LACBWR.

All references to Assistant General Manager-Power have been removed and the organizational charts have been revised to reflect our current organizational structure.

DAIRYLAND POWER COOPERATIVE

LACBWR PLANT

STATEMENT OF QUALITY ASSURANCE POLICY

The Quality Assurance Program described herein has been developed by the Dairyland Power Cooperative to assure safe and reliable operation of LACBWR. This program is designed to meet the requirements of Title 10 of the Code of Federal Regulations, Part 50, Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants."

The Quality Assurance Program applies to all activities affecting the safety related functions of the structures, systems, and components that prevent or mitigate the consequences of postulated accidents that could cause undue risk to the health and safety of the public. These activities include design, operations, maintenance, repair, refueling, testing, and modifications.

The LACBWR Plant Superintendent is responsible for the establishment of a Quality Assurance Program which meets the requirements of 10CFR50, Appendix B. The LACBWR Quality Supervisor is responsible for implementing the program.
