Gentlemen:

This refers to the routine safety inspection conducted by Mr. G. L. Shear of this office on July 15-16 and 18, 1985 of activities at Southeast Missouri Hospital authorized by NRC Byproduct Material Licenses No. 24-00128-03, No. 24-00128-05, and Special Nuclear Material License No. SNM-1595 and to the discussion of our findings with you and Mr. W. D. Agnew at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated July 22, 1982, regarding apparent items of noncompliance found during our June 15, 1982 inspection. We have no further questions regarding these matters.

During this inspection, certain of your activities under Licenses No. 24-00128-03 and No. 24-00128-05 appeared to be in noncompliance with NRC requirements, as specified in the enclosed Appendix. A written response is required.

No items of noncompliance were identified for License No. SNM-1595.

The responses directed by this letter and the accompanying Notice (Order) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
