US Nuclear Regulatory Commission
Washington, DC 20555

Gentlemen:

Kindly amend our Material License #19-07538-01 to permit the possession of 500 mCi of iodine-125 as a sealed source in a Lixiscope. This will be in addition to our current license possession limit. We will be evaluating a Lixiscope for approximately 60 days as part of our activities at the Center for Devices and Radiological Health. At the end of the study period, the Lixiscope will be returned to the manufacturer.

Sincerely yours,

Gail D. Schmidt
Chairman
Radiation Safety Committee
