JUL 11 1985

✓ General Electric Company  
ATTN: Mr. Eugene A. Lees, General Manager  
Nuclear Fuel Manufacturing Department  
P. O. Box 780  
Wilmington, NC 28402

Gentlemen:

SUBJECT: REPORT NO. 70-1113/84-15

Thank you for your responses of March 7 and May 9, 1985, to our Notice of Violation issued on February 7, 1985, concerning activities conducted at your Nuclear Fuel Manufacturing Department. We have evaluated your responses and found that they meet the requirements of 10 CFR 2.201. We will examine the implementation of your corrective actions during future inspections.

In a telephone conversation between Mr. C. M. Vaughan of your staff and Mr. D. M. Collins of my staff on July 10, 1985, Mr. Vaughan confirmed that the areas of the Chemet Lab where uncontained uranium is handled is now designated a controlled area, as defined by your license, with special contamination limits as specified in your letter of May 9, 1985.

We appreciate your cooperation in this matter.

Sincerely,

J. Philip Stohr, Director  
Division of Radiation Safety  
and Safeguards
