U.S. Atomic Energy Commission
Attention: Isotopes Branch
Division of Licensing and Regulation
Washington, D. C.

Dear Sir:

Enclosed in triplicate is an AEC-313 Byproduct Material License Application form. The model 465 Portable X-ray Fluorescent unit, manufactured by Texas Nuclear Corporation, will be used by company geologists in the field for minerals exploration. All personnel handling this instrument will be properly instructed in its use and safety precautions.

Because of lease time scheduling and weather restrictions we are most anxious to start using this instrument, and would greatly appreciate prompt processing of this application. Please contact me by collect telephone if you need additional information.

Thank you.

Sincerely,

V. J. Barczak
Petrographer
