 Docket No. 40-4492

American Nuclear Corporation
 ATTN: Mr. Niles Andrus
 314 W. Midwest Ave.
 Casper, WY 82601

Dear Mr. Andrus:

As discussed at our meeting of May 30, 1985, my staff has completed a preliminary review of your document entitled, "Review of ANC's Gas Hills Tailings Ground-Water Quality, May, 1985." Our review has identified three areas where additional information is necessary to complete our pending licensing action.

1. Please supply measuring point elevations, in feet above mean sea level, for each well.
2. Based upon your recent activities in the wellfield please provide the status of each well i.e., dry, broken casing, pumping, etc. Additionally, all available completion details for the wells would be helpful.
3. Please supply several copies of a contour map which shows the locations of all monitoring wells discussed in the above cited report as well as the tailings impoundments. A convenient scale would be 1" = 400 or 500 feet.

Thank you for your cooperation in this matter. If you should have any questions concerning this request, please contact Gary Konwinski of my staff.

Sincerely,

/s/
