 Docket No. 40-8745

MEMORANDUM FOR: William J. Dircks
 Executive Director for Operations

FROM: R. Dale Smith, Director
 Uranium Recovery Field Office
 Region IV

SUBJECT: NOTIFICATION REGARDING OGLE PETROLEUM, INC.

In accordance with a March 1983 directive that any actions taken in regard to the Ogle Petroleum, Inc. Source Material License be cleared with your office, I am notifying you by this memorandum of recent information we have received regarding this licensee. Over the last 5 years, a series of corporate reorganizations was effected which transferred the responsibilities of the original licensee to a new corporation. These transfers took place without any formal notification to the NRC and when combined with adverse financial circumstances of the parties involved, have raised serious questions about continued ability to meet license requirements. URFO is coordinating inquiries and activities related to this matter with Region IV counsel as well as with the Wyoming Department of Environmental Quality. We will continue to keep you informed of developments as warranted.
