SUBJECT: BOARD NOTIFICATION - RESPONSE TO ATOMIC SAFETY  
AND LICENSING BOARD (ASLB) MEMORANDUM DATED  
APRIL 30, 1985  
(BOARD NOTIFICATION NO. 85-073)

This Notification is being provided to the Commission in accordance with the revised Commission's notification policy of July 6, 1984, to inform the Commission on all issues on the cases before the Commission.

By ASLB memorandum dated April 30, 1985, the Board requested that the staff forward to the ACRS for its consideration copies of NUREG-0797 - Comanche Peak Supplement Safety Evaluation Reports (SSER's) 7 through 11, and that they be informed of the staff's response to the request. These SSER's provide the results of the staff's evaluation and resolution of technical concerns and allegations primarily in the areas of construction practices and quality control inspections.

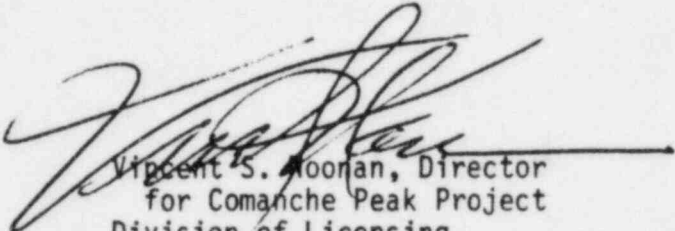

In order to confirm the ACRS was receiving routine distribution of these SSER's, by memorandum for D. Ward, Chairman, ACRS, dated July 26, 1985, I forwarded the Board's request, and requested I be contacted if additional copies of the SSER's were needed (See Enclosure 1). This memorandum was later clarified by memorandum for D. Ward, Chairman, ACRS, dated August 9,

1985, to state that the staff is not requesting the ACRS review these documents. The NRC staff will, of course, continue to follow up on the matters raised in these SSERs to assure that appropriate corrective action is taken (See Enclosure 2).

The parties to the proceeding are being notified by copy of this memorandum.
