ATTACHMENT 1

Grant No. NRC-04-97-043 Entitled: "Design of Effective Effluent and Environment Radiological Monitoring Programs"

The National Council on Radiation Protection and Measurements (NCRP) shall provide the Nuclear Regulatory Commission (NRC) with a Final Report that shall be submitted in such a form and content whereby the information can be readily used by most materials licensees as well as reactor licensees, in order to support improvements to their air effluent monitoring program. The Final Report shall also provide suggested guidelines for when, where, and how to perform effective environmental monitoring at many different types of facilities (i.e., nuclear pharmacies, fuel cycle facilities, etc.), and not only at large broad scope licensees or reactor facilities. The goal is to provide a document that might be referenced by NRC as containing methods acceptable for compliance with NRC's requirements.
