Proposed Lic. No. 4-580-6A60 (5 copies)

A/8

U. S. ATOMIC ENERGY COMMISSION
BYPRODUCT MATERIAL LICENSE

PROPOSED

Pursuant to the Atomic Energy Act of 1954 and Title 10, Code of Federal Regulations, Chapter 1, Part 30, Licensing of Byproduct Material, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, own, possess, transfer and import byproduct material listed below; and to use such byproduct material for the purpose(s) and at the place(s) designated below. This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, and is subject to all applicable rules, regulations, and orders of the Atomic Energy Commission now or hereafter in effect and to any conditions specified below.

Licensee		
1. Name	Isotopes Specialties Company, Inc. Industrial Department	3. License number 4-580-6A60
2. Address	170 West Providencia Burbank, California	4. Expiration date January 31, 1960
		5. Reference No. 4-580-3
6. Byproduct material (element and mass number) Any byproduct material between Atomic Numbers 3-83, inclusive, and source materials.	7. Chemical and/or physical form Any form as waste materials.	8. Maximum amount of radioactivity which licensee may possess at any one time 100 curies total of byproduct and source material wastes.
9. Authorized use		
1. Collection of byproduct and source materials in the form of wastes from A.E.C. licensed users.		
2. Preparation of waste materials for storage and disposal.		
3. Sea disposal of byproduct and source material wastes.		

CONDITIONS

10. Unless otherwise specified, the authorized place of use is the licensee's address stated in Item 2 above.
11. Byproduct and source materials to be handled by, or under the supervision of individuals designated by the Radioisotope Committee, Allen M. Goldstein, General Manager.
12. Written administrative instructions covering appropriate radiological protection phases of operational procedures and establishing responsibility for radiological protection, control, and security of the byproduct material shall be supplied individuals handling or having responsibility for handling of such material.
13. At least 10 days prior to each disposal event, the licensee shall notify the Atomic Energy Commission of the ownership and description of vessel used for sea disposal, proposed date for disposal, location (longitude and latitude) of disposal site, total number of containers (barrels, etc.), the total activity in millicuries and the most hazardous radioisotope(s) contained in each container.
