

MEMORANDUM

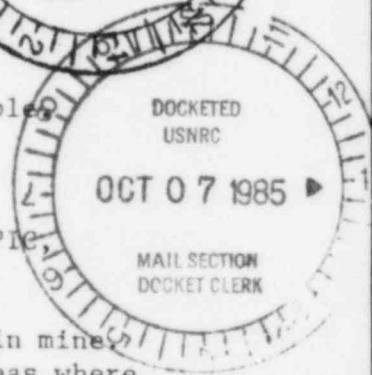

04008748-
RETURN ORIGINAL TO PDR HQ

TO FILE : Permit No. 504, Ogle Petroleum
FROM : Rick Engelmann, District II Supervisor
SUBJECT : Phone conversation w Glenn Catchpole
DATE : September 30, 1985

On the above date I discussed the following items with Mr. Catchpole:

- Confidentiality of his July 12, 1985 correspondence to me.
- The meeting held in Denver on September 19, 1985 between OPI, OPI and Western fuels.

The September 19 meeting discussed budget items for the Bison Basin mine. The future of the project was also discussed, leading to three areas where agreement was not reached:

1. Western informed OPI they did not want to become licensed, or co-licensed, under either DEQ's or NRC's permit.
2. Western advocated immediate initiation of decommissioning. OPI/OPIC are opposed, primarily (?) because they do not have the financial capability to do this.
3. Joint financing of decommissioning was discussed. Again, no resolution was achieved.

Mr. Catchpole stated that although many issues were not resolved, the meeting was constructive.
