OFFICE OF  
SECRETARY  
BIA  
Dear Chairman Palladino,

As a resident of Georgia I am concerned about the use of Highly Enriched Uranium at the reactor at the Ga. Institute of Technology. I understand that the NRC is proposing rules to require the use of Low Enriched Uranium instead. I hope that the Commission will approve the rule as published, and not follow weakening rules as submitted by the NRC staff.

Sincerely,  
Jon Clements
