1. The above analyses were confirmed by repeat analysis of the sample. Resampling did not support the premise that an exposure had taken place except in employees H., L., O., and P.
2. Air sample data was examined and found to be representative for the areas.
3. Yellowcake areas were elevated in June. Cleanup of the yellowcake areas was initiated.
4. Other workers performing the same job did not show elevated levels of uranium.
5. Work assignment limitation considered and implemented for employees L., O., and P.
