SUMMARY OF ORDER BEFORE COMMISSION FOR AFFIRMATION (SECY-84-475A)

The order presented by OGC and OPE in SECY-84-475 has been revised pursuant to Commission instructions. The revised order discusses each issue which a party to the restart proceeding argues should be the subject of further hearings.

The order as revised states that the Licensing Board should issue its decisions on the training and Dieckamp mailgram issues since the hearings on those issues have been completed. The order finds that no further hearings are warranted within the restart proceeding.

The order further states, however, that the Commission will be instituting a new proceeding to consider what action to take concerning those individuals possibly involved in the ~~met~~ TMI-2 leak rate falsifications, except for those individuals who were identified as not involved by the statement of the United States Attorney at the Sentencing hearing of Metropolitan Edison Company, or those already reviewed and found not to be implicated by the NRC's Office of Investigations in its TMI-1 leak rate investigation.

In addition, the Commission has decided that Charles Husted should be given an opportunity to request a hearing on the Appeal Board's condition that he have no supervisory responsibilities insofar as the training of non-licensed personnel is concerned.

Finally, the order imposes ~~two~~ conditions on licensee:

- (1) No pre-accident TMI-2 operator, shift supervisor, shift foreman, or certain other individuals shall be employed at TMI-1 in a responsible management or operational position without specific Commission approval;
- (2) Licensee is to retain its expanded Board of Directors and its Nuclear Safety and Compliance Committee.
