The Commission has issued the enclosed Amendment No. 69 to Facility Operating License No. DPR-61 for the Haddam Neck Plant. This amendment is in response to your application dated July 10, 1985 as modified August 1, 1985.

This license amendment modifies the plant Technical Specification by incorporating requirements which restrict the volume of flammable liquids in the control room to no greater than one pint. If it becomes necessary to introduce quantities of flammable liquids in excess of one pint, written permission is obtained from the Supervising Control Operator or Shift Supervisor and a dedicated fire watch is assigned to the activity to ensure that the flammable liquid would not threaten the safe shutdown capability.

A Notice of Consideration of Issuance of Amendment to License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing related to the requested action was published in the Federal Register on August 28, 1985 (50 FR 34936). No comments or requests for hearing were received.

A copy of our related Safety Evaluation is enclosed. This action will appear in the Commission's biweekly notice publication in the Federal Register.

Sincerely,

Original signed by:
