Gentlemen:

SUBJECT: REPORT NO. 50-302/85-35

On August 11-15 and 22-23, 1985, NRC inspected activities authorized by NRC Operating License DPR-72 for your Crystal River facility. At the conclusion of the inspections, the findings were discussed with those members of your staff identified in the enclosed inspection report. Concerns relating to the inspection findings were discussed with you and members of your staff during an Enforcement Conference held in the Region II office on September 13, 1985.

The information relating to the alleged unauthorized introduction of firearms into the protected area, developed by your further investigation and provided at the enforcement conference, was at variance with previous statements by personnel involved. As a result of the variables presented, the occurrence of a violation of regulatory requirements could not be established.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities violated NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are presented in the enclosed Notice of Violation.

In accordance with 10 CFR 2.790(d) and 10 CFR 73.21, safeguards activities and security measures are exempt from public disclosure; therefore, the enclosures to this letter, with the exception of the report cover page which presents a nonexempt summary, will not be placed in NRC's Public Document Room.

The responses directed by this letter and the enclosures are not subject to the clearance procedures of the Office of Management and Budget issued under the Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions concerning this letter, please contact us.

Sincerely,
