USNRC Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Sirs:

We are writing to request that NRC license number 48-01338-01 be amended due to changes in personnel and procedures.

Please add Howard J. Lewis, M.D. as a user of Group VI (10CFR35.100 Schedule A) materials and depleted uranium for shielding of medical linear accelerators. Please note that Dr. Lewis was certified by the American Board of Radiology (Radiation Therapy Specialty) on June 1, 1984.

Please also add John R. Glover, Ph.D., as an authorized user of byproduct materials for non-human uses under this license. Please note that Dr. Glover has been listed as a user for these purposes on other NRC licenses, most recently license number 21-01102-04.

We would like to increase our possession limit of Group III (10CFR35.100 Schedule A) material from 5 Ci to 7 Ci. This is necessary due to an increase in the number and types of nuclear medicine studies performed with this material and to fully account for spent generators decaying-in-storage. Radiation safety procedures and practices shall be maintained so as to keep patient, visitor and employee exposures ALARA.

We further request authorization for Doctors Fidler, Klein, Richards, and Lewis to use sealed-in-an-applicator Strontium-90 brachytherapy sources for the treatment of superficial verrucae (plantar warts). Please note that these physicians presently have (or will have) authorization for Group VI materials.

Enclosed please find a check in the amount of \$120.00 to cover the cost of this amendment request. Please feel free to contact us at (414) 649-6457 should there be any questions regarding this amendment.
