Re: Miles Laboratories, Inc., Elkhart, Indiana
Byproduct Material License #13-02249-01

Gentlemen:

Miles Laboratories, Inc. hereby applies for renewal of Byproduct Material License #13-02249-01 which expires on December 31, 1983. We wish to renew such license in its present form as it has been amended from time to time. More specifically we desire to continue the authority granted in license dated December 19, 1978, and those statements, representations, procedures and attachments contained in letters dated February 6, 1980; March 10, 1980; October 15, 1980; January 12, 1983; and February 10, 1983. The letter of November 28, 1979 should be deleted from consideration and the letter of January 12, 1983 supersedes the application of October 27, 1982.

We no longer require authorization to possess up to 800 millicuries of Iodine-125; a limit of 400 millicuries should be adequate. We, respectfully, request at this time authorization to increase our possession limit of Phosphorous-32 to 200 millicuries.

The radiation protection program is now governed by a revised Radioisotope Guidelines Manual, issued in October 1981. (Two copies enclosed.) This will supersede the manual supplied with the license renewal application dated March 20, 1978. Also, the manual, "Radiation Monitoring and Personnel Protection in Production of Hepatitis B Surface Antigen ¹²⁵I (Human) Diagnostic Kit" is no longer utilized as the production of this product has been discontinued.

Pursuant to the fee schedule in 10 C FR Section 170.31, we are enclosing a check in the amount of \$460 as the fee for this renewal application.

We trust the information in this letter and the enclosure contain the information necessary to process the license renewal submission. If you have further questions, you may contact Mr. Kenyon Yoder, phone 219/262-7574, or myself at the number indicated on the letterhead.

Very truly yours,

MILES LABORATORIES, INC.
