Docket: 30-28679/85-01

Community Hospital
ATTN: Talton L. Francis, Administrator
West Second Street & Lincoln
Elk City, OK 73644

Gentlemen:

This refers to the unannounced radiation safety inspection conducted by Mr. R. Wise of this office during the period August 27-28, 1985, of activities authorized by NRC Byproduct Material License 35-23180-01 and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations, and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

In addition to the above areas, the NRC inspector reviewed allegations received by the NRC concerning misadministration of radiopharmaceuticals, use of unqualified nuclear medicine technicians, conducting nuclear medicine in the absence of an authorized user and physicians named as users on the license had not applied or given their consent for the use of their name in the application. The enclosed inspection report 30-28679/85-01 documents our inspection findings.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. Consequently, you are required to respond to this violation in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
