SUBJ: RADIATION SURVEY OF REPAIR AREAS IN ICPB

REF: (a) NAVSEASYSKOMDET (RASO) 8128/3253.10B ser 6446W/091 dtd 8 Feb 85

ENCL: (1) Map of ICPB Work Areas

1. Reference (a) requires a radiation survey of the work areas in Inert Components Processing Building (ICPB) to assure decontamination of the facility.
2. The last repair of POLARIS A3 equipment sections and interstage sections was performed in 1980 in the areas of ICPB designated on enclosure (1). Surveys of these areas using PDR-27 and PDR-56 survey meters were performed on 1 March 1985. The floors of this area have been stripped and waxed numerous times since the last repairs were performed. The survey included samples removed from crevices and joints of ground plug areas, and the areas at the base of the support pillars. There was no detectable radioactivity in any of the samples or areas surveyed.
3. This survey was performed to release the premises used under the operational guides of NRC License No. STB-930 at the Strategic Weapons Facility Pacific, Bremerton, WA as requested by reference (a). Termination of NRC License No. STB-930 has been requested.
