Docket No. 030-22221

Dear Sir:

Condition 11 on License 19-23454-02G was changed from an annual report to a quarterly report by NRC on the most recent renewal (Oct 1984). I request that this report requirement be changed back to an annual reporting requirement.

The number of sales per year are so small that quarterly reporting is an unneeded requirement. We typically distribute less than 20 sources per year. Our whole initial inventory is less than 100 sources.

Hence, in the interest of reducing overhead costs, an annual reporting requirement would seem adequate.

Should you have questions or desire more information, please contact L. A. Slaback or T. G. Hobbs at 921-2247.

Sincerely,

Lyman E. Pevey
