Docket No. 030-22221

Gentlemen:

We request amendment of license number 19-23454-02G to eliminate reporting requirements for source distributions as specified in the license's condition 11. We typically distribute fewer than 20 sources each year. Our initial inventory of sources for distribution is nominally about 100 sources. A significant resource expenditure for an insignificant control mechanism can be eliminated by this.

This letter supersedes our request of August 12 concerning this matter. Please direct questions about this to T. Hobbs or L. Slaback at 301-921-2247.

Sincerely,

L. E. Pevey
Chief, Occupational Health
and Safety Division
(Materials License Manager)
