Re: Renewal of Materials License
No. 24-18942-01

Gentlemen:

This letter (in duplicate) constitutes our application for renewal of our current material license. Enclosed is a check for \$120.00, which we understand from a telephone conversation with Ms. Cheryl Phillips in your Washington office, is the appropriate fee for license renewal on our 3P classification.

Allgeier-Martin requests renewal of its existing license and wishes to continue operating under that license. Previously submitted documents pertinent to the license include:

<u>Date</u>	<u>Item</u>
May 19, 1980	Byproduct Material Application
July 23, 1980	Amended Application for Material License

The equipment, facilities, and radiation safety procedures described in the letter document have not changed, and we wish to continue to operate as indicated. The only change is in personnel. Carson Crouse, previously identified as the "radiation protection officer" and as a user of the licensed material, is no longer employed by the firm. He is replaced in the capacity as "radiation protection officer" by Jack McKibben, whose training and certification were documented in our July 23, 1980 submission. Furthermore, Michael Ernest, who joined the firm in 1981, should be added to the list of personnel who have completed basic on-the-job training and is to be a user of the licensed material. Finally, additional training for all personnel indicated as users of the licensed material has been arranged and will be provided by the equipment manufacturer, Campbell Pacific Nuclear Corporation, in June or July 1985.
